<Nasma Chaoui> - <536 979 360>

<Safae Elfattahi> - <536 831 453>

<Hiba Mameri> - < 536 850 394>

How to Launch the UFood Project:

Step 1: Setup Instructions

1. **Open Project:**
   Open folder ufood-h2024-team-17-master in an IDE

2. **Install Dependencies:**

Code:

npm install

Step 2: Launching the Application

1. **Run Development Server:**
   Start the development server to launch the application locally.

Code :

npm run serve

2. **Access the Application:**
   Open your web browser and navigate to the specified address (usually http://localhost:8080) to access the Vue restaurant directory web application.

Specifications:

The home button is the logo.
To access a restaurant, click on the card of the restaurant.
